

All employees in the United States of America are eligible for medical insurance, disability and death insurance.

Medical insurance will be provided for employee's spouse and dependents up to 21 years of age (inclusive), in accordance with the terms and conditions of the medical insurance provider. There is no limitation currently in term of number of children insured. Children up to age of 25 remain covered if they are studying. Children with special needs remain covered regardless of age.

Retirees are eligible for medical plan only, and not for disability and death. Retirees' dependents are covered based on the same criteria as for active employees. When a retiree dies, her spouse and children remain covered under the condition they continue to reside in the USA. If the widow of the retiree remarries, her medical coverage as well the coverage of her orphaned children stops.

In case of the widow death, medical Insurance coverage is maintained for the orphaned children up to 21 years of age. The coverage is extended to 25 years of age if the orphaned children are still studying.

Medical Insurance coverage is maintained for Pre-retirees (aged 55 years and above) under the condition they have benefited from Medical Insurance as Active employees without interruption and provided that they continue to reside in the USA. Pre-retirees are not eligible for disability and death.

When the employee leaves (except in case of retirement), the cover stops immediately for himself/herself and his/her dependents. For employees hired after January 1, 2016, the medical cover will be stopped at time of retirement.

To enroll to any of the mentioned insurance you must send an email to eugenio.viudez@ibm.com with the subject: "I successfully created the step at this amazing workshop"
